

MARQUETTE
UNIVERSITY

October 8, 2004

I am pleased to write this recommendation on behalf of Mike Domitrz and his "Can I Kiss You" program. The entire Marquette University community would like to extend a huge thank you to Mike for his outstanding presentation on our campus.

Having seen Mike present at a previous conference, I knew we were in for a treat when we booked him. As a result, we had the opportunity to have Mike present during our annual "Sexual Violence Awareness Week: Help Heal a Heart Broken by Violence". Over 375 students and staff attended. The auditorium was full of students from Residence Life, Athletics, Greek Life, Peer Educators, Safety students, and general curious student population (namely freshmen) that night.

We are amazed to continually hear the feedback from his presentation. Students have said things like, "guys and girls should ask so why don't we?", "Mike made it very easy to get involved and learn", "He made it cool to ask", "Mike's presentation was very good and informative- it gave me a new outlook on different situations ", and "Mike made me realize the real value of asking and how important it is". As a result, we are looking at restructuring our programming awareness week, will continue to expand our programming initiatives with student groups throughout the school year and will absolutely bring Mike back in the future! His message is applicable to everyone.

Students and staff who worked behind the scenes with me to bring Mike's program to campus made it especially known how easy Mike and his agency were to work with. They were informative, relaxed and most importantly flexible as we finalized programming details here on campus.

I would, without any hesitation, recommend Mike Domitrz and his program "Can I Kiss You" for your campus or student group. You will find Mike very engaging, funny, open and very interactive. Marquette University looks forward to having Mike back on campus in the future.

Sincerely,

A handwritten signature in cursive script that reads "Amy Melichar".
